ABSTRACT:

PURPOSE: To obtain the title cosmetic not causing make-up disorder with water, sweat, sebum, etc., and separation of cosmetic film, containing coated powder prepared by forming a covering layer consisting of a water repelling and oil repelling agent and/or oil agent and a reactive auxiliary on an activated inorganic powder base by baking.

CONSTITUTION: An inorganic powder base such as inorganic pigment, other inorganic powder or a mixture thereof is activated by heat treatment or plasma treatment to give an activated inorganic powder base, which is coated with a covering layer consisting of a water repelling and oil repelling agent (e.g., fluorosilane or urethane bond-containing fluorosilane) and/or an oil agent (e.g., organic titanate) and a reactive auxiliary by baking (constituent materials of coated layer are firmly bonded to powder base and the said constituent materials are mutually crosslinked to form structure) to give a make-up cosmetic containing the prepared coated powder.
